Software Engineering fresh graduate and full-stack .NET developer building web applications with C#, ASP.NET Core, Entity Framework Core, and Angular. Hands-on experience with REST APIs, SQL Server, Clean Architecture, and Generative AI-integration.

TECHNICAL SKILLS

- **Languages:** C#, TypeScript, JavaScript (ES6+), Python, C++
- **Backend & Databases:** ASP.NET Core Web API, ASP.NET Core MVC, RESTful APIs, Entity Framework Core, LINQ, SQL Server, JWT Authentication, Database Design
- **Frontend:** Angular, HTML5, CSS3, Bootstrap 5, Responsive Design
- **Concepts:** OOP, SOLID, Design Patterns, Clean Architecture, Agile
- **Tools & Practices:** Git, Docker, Swagger / OpenAPI, Postman, Azure (Foundations), AI tools (Semantic Kernel, Claude Code)

EXPERIENCE & TRAINING

Freelance .NET Developer — [Kasheif](#) (كاشف)

Jul 2026 – Present

- Gather requirements directly with the platform owner, prioritize features, and deliver them end to end on a production ASP.NET Core MVC platform serving **4,000+ users**, a Shariah-compliant stock screening service for the Egyptian Exchange.
- Built stock recommendations (admin-published and user-private), portfolio tracking with a user-defined maximum risk ratio enforced across the wallet, and a real wallet showing live profit and loss on stocks users actually own, built with EF Core, service-layer logic, and role-based admin UI.
- Redesigned the home page and added videos and Analytical Articles sections, where platform-approved analysts publish analysis that users can like, comment on, and browse by analyst profile.
- Improved search visibility to a **top-3** Google ranking via Google Search Console; deployed the platform on SmarterASP.NET.

Full-Stack Web & Generative AI Development (.NET) — ITI, Tanta Branch (Training Program)

Jan 2026 – Jun 2026

- Intensive 6-month program covering ASP.NET Core backend, Angular frontend, database design, and agentic AI.

Technical Support Intern — Incorta, Cairo

Aug 2025 – Oct 2025

- Collaborated in resolving customer-reported issues in Zendesk, using SSH, KLOGG log analysis, and shell scripts.

PROJECTS

GiftWave — AI-Powered Digital Gift-Card Platform | ASP.NET Core, Angular, Semantic Kernel, Qdrant, Redis

- Gift-card platform where customers send cards via WhatsApp/SMS and recipients redeem at partner merchants via QR; built on Clean Architecture in Agile sprints (ITI graduation project, team).
- Integrated a RAG pipeline with Qdrant vector search and a multi-agent system (recommendation, customer-support, rule-based fraud detection) using Microsoft Semantic Kernel.

Digital Wallet REST API | ASP.NET Core Web API, Entity Framework Core, SQL Server

- Wallet backend supporting authentication, deposits, withdrawals, and peer-to-peer transfers with transaction history and daily transfer limits.
- Applied centralized error handling and documented all endpoints with Swagger / OpenAPI.

Full-Stack E-Commerce Platform | ASP.NET Core Web API, Angular, EF Core, SQL Server

- Multi-role store (Admin, Seller, Customer) with JWT authentication and role-based authorization, built on a 3-layer architecture with Repository and Unit of Work.
- Developed 12 REST API controllers covering auth, products, orders, cart, wishlist, and reviews.

EDUCATION & SCHOLARSHIPS

Assiut University — B.Sc. Computer Science and Information, Software Engineering Major

GPA 3.33 (Very Good) · Graduation Project Grade: A

University Of Arizona — Fully Funded Scholarship

USAID Study-Abroad Scholarship (U.S. Department of State), one semester at the University of Arizona, Tucson.

LANGUAGES

Arabic (Native) · English (C1)

Accomplishments

- Team Leader, “ECO-H2O”: won the Grand Challenge (organized by AUC) and was awarded **50,000 EGP** in funding.
- EYouth Data Bootcamp: 2nd place; awarded **4,000 EGP**.
